

## Initial Proposal Toby Creek Easement Exchange

The Montana Department of Natural Resources and Conservation, Kalispell Unit is proposing an easement exchange on the following parcel:

Section 7 T30N, R22W State Normal School Trust

The proposed project is located in the Toby Creek drainage, approximately 5 air miles southwest of Whitefish, Montana and south of Twin Bridges Road.

This easement exchange is being considered to provide improved access to trust land, resolve encroachment and trespass uses of trust land, and generate revenue for the State Normal School (S.N.S.) Trust Fund. If approved, this easement exchange would likely occur in 2016 and would result in permanent access to state trust land and provide the proponents an easement on approximately 2 acres of trust land.

The Montana DNRC invites comments concerning this proposal. Please respond by November 23, 2015 to:
